THE ~~VISION BOARD~~

THE "DELUSION" BOARD

Window?

"Visionary" - single person who takes credit for many peoples work

Delusionaries: live in a dream until enough people join to make it a reality

SO weird that vision boarding is a private/solitary activity, when reality is created by with other people

A social space between fact and fiction

The algorithm reflects us, and we as humanity have to decide whether we're OK with what we see

Collaborative moodboards where you dream together

Be able to visualise collective emotional growth rather than status

MAYAworld Datascape:

MAYA is what we put into it:
Built by the people, owned by the people

MAYA LAW

TO the most ethical standard **you can imagine** … i.e. the most likely to benefit the community - i.e. delusion commemorated on board

YOU GET FINED IF PEOPLE THINK YOU SHOULD BE HITTIN A HIGHER STANDARD .. I.E. YOUR BOARD VERSUS REAL LIFE (fined in attention on the algorithm)
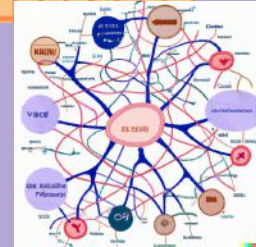

Potential rules:
Code is law
Posting to public boards makes history
@ means you are mod
Do what you think is kind
Time is what you make it
